Advertiser friends,

IMAC France is an association of French pilots, whose passion and sport, is to perform aerobatic competitions with model airplanes, replicas of existing aircraft, closer to the modern size aerobatics in the well-known style of the EVAA Air Force team.

The goal is to have a French team participate in the next World Championships held in Indiana in the United States in September: the 2018 IMAC World Championships.

The aircraft used for this type of competition, with a wingspan of 2.70 to 3 meters and a weight of 15 to 25 kg, with gasoline engines of 100 to 200 cm³, are specific to each pilot and represent a significant investment. They must be sent to the competition site.

The "Lecture Scale Model Aerobatic Cup 2018" event is a springboard for the formation of a French team to participate and represent in all categories of "IMAC 2018 World's championship".

To put the drivers in the best conditions, a competition organized with us in conditions close to what we will live on site, with judges and drivers from France and abroad, seems to us to be a very good training, taking the aspect competition flights, but also the international regulation of the discipline with the consideration of an international jury.

Our pilots participating in these World Championships in September, must constitute a substantial budget, air tickets, commitment, accommodation during the competition, but they will also need to transport their aircraft and the necessary spare parts in case of problems ...

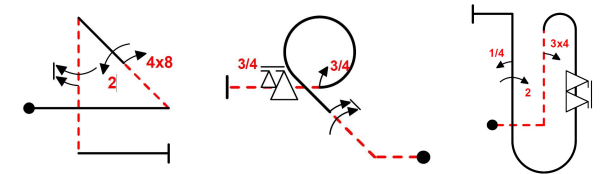

The "Lecture Scale Model Aerobatic Cup 2018" is now of great importance for the IMAC France association, for pilots who will be able to fully understand all aspects of the upcoming competition, as well as for you, a privileged partner, by showing your support, by promoting your products, your know-how, while helping this team, during this event, a great showcase local, national and even international, with the repercussions during all the trip of World Championships.

We need sponsors like you.

There are different levels of sponsorship, visibility of our advertisers during the event, but also on our website <http://www.mini-iac.fr/>.

In addition, there is the international vision that accompanies your participation.

Thank you for helping us by choosing a level of sponsorship that matches your wishes and join us at these world-class events.

« Lecture Scale Model Aérobatic Cup 2018 » du 18 au 20 mai 2018.

« IMAC 2018 World's championship » du 4 au 9 septembre 2018.

We look forward to your support.

We thank you,

The President of IMAC France
